RETRACTABLE CORD REEL FOR FIBER!

"Lightning fast delivery and storage"

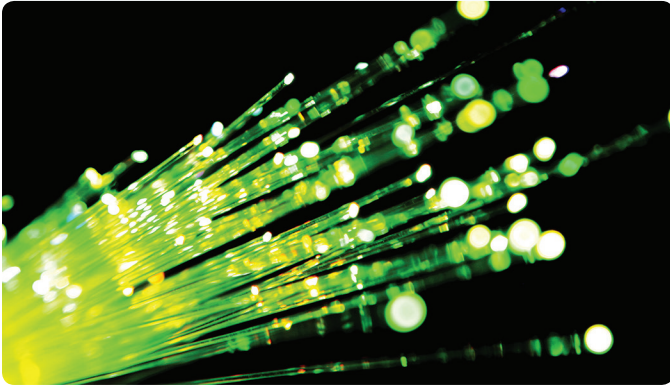

- Great for quick cable runs and fast connections
- Perfect for ENG trucks and Patching
- Supports bandwidth for 4K and 8K formats
- Continuous end to end, no fiber splices

The Bright Reel™ fiber optic cord reel is a solution designed specifically for the unique needs of the broadcast industry. This product features new proprietary cord reel technology from Telefonix, Inc, the company behind the cord reel technology that has been flying on the majority of the world's long-haul aircraft for over 2 decades. The Bright Reel cord reel retracts up to 15ft of fiber (depending on fiber selected) with up to 12 channels of continuous end to

end fiber, with no splices within the cord reel. This product has been tested to over 12,000 cycles using stringent test protocols. The fiber is protected by a rugged stainless steel jacketed armoring to prevent moisture and corrosion in various environments.

The Bright Reel cord reel is designed for indoor and outdoor use. Available in custom lengths and channel counts.

PATENT PENDING
